

BuildRunKit Dashboard Infrastructure Overview

BuildRunKit Dashboard Infrastructure Overview

The screenshot shows the 'Worker Dashboard' in the BuildRunKit application. The top navigation bar includes the BuildRunKit logo, user information for 'Bernadette P's ...', and a notification bell. The left sidebar contains navigation options: Dashboard, Brands, Journeys, Tools, Saved Outputs, HUBS (Strategy Hub), and GOLDOCKETS SUITE (Settings, Feedback, Help & Support). The main content area is titled 'Worker Dashboard' and includes a 'Change visualization' dropdown set to 'Worker View'. Below this is a 'WHERE TO NOW?' section with six action buttons: Finish Onboarding, Continue Journeys, Check Projects Tasks, Manage Contacts, Check Invoices, and Add New Invoices Items. The 'WORKSPACE OVERVIEW' section features four data cards: Strategy Hub (Tasks: 100, Issues: 1, Notes: 3, Last Updated: 5/21/2026), CRM (Deals: 0, Contacts: 10, Tasks: 0, Pipeline: \$0), Projects (Active: 11, Milestones: 50, Tasks: 0, Progress: 0%), and Invoices (Outstanding: 0, Pending: 0, Overdue: 0, Paid MTD: \$0). At the bottom, there are sections for 'RECENT ACTIVITY' and 'YOUR BRANDS'.

This screenshot displays the 'RECENT TOOLS' and 'RECOMMENDED TOOLS' sections of the BuildRunKit dashboard. The 'RECENT TOOLS' section shows a list of 'Founder Journey' items with timestamps ranging from 'Just now' to '5/22/2026'. Below this is a 'RECENT TOOLS' row with buttons for Journeys, Strategy Item, Strategy Hub, and Project Milestone. The 'RECOMMENDED TOOLS' section features five tool cards: Invoice Generator (Business), QR Code Generator (Utility), QR Code Reader (Utility), Text to Speech (Productivity), and Wordcloud Generator (Design). Each card includes a description, category, and a 'Launch tool' button.

The BuildRunKit interface provides a multi-layered, role-based dashboard system tailored for modern startup ecosystems. The core setup features deep integration with the Goldilocks Suite and supports seamless switching between operational perspectives.

1. Role-Based Dashboards & Visualization Switching

Users can dynamically shift their view depending on their operational focus via a dropdown menu in the upper right-hand corner of the platform. The system architecture supports four distinct, role-based dashboard options:

- Worker View (Currently Selected)
- Business Coach View
- Executive View
- Founder View

2. Workspace Selector

In the top navigation header, a dropdown utility allows users to access and pivot between different organizational workspaces:

- Official BuildRunKit Ecosystem (Labeled as "Custom")
- Bernadette.F's Workspace (Currently Active with "All Access" privileges)
- Training & Demo (Labeled as "Enterprise")
- Create Workspace (\$+\$): A dedicated utility to deploy new isolated team environments.

3. Main Interface Layout (Worker View)

The full workspace structure is segmented into distinct navigational, strategic, and tool-based panels designed for day-to-day workflow tracking.

Sidebar Navigation & Hubs

The left sidebar offers quick-access routes across the enterprise:

- Core Paths: Dashboard, Brands, Journeys, Tools, and Saved Outputs.
- Hubs Section: A dedicated entry point for the Strategy Hub.
- Goldilocks Suite Integration: Direct sidebar modules for managing CRM, Invoice, and Projects.
- Footer Utilities: Settings, Feedback, and Help & Support.

"Where to Now?" Action Bar

Positioned right at the top of the main canvas to guide immediate focus:

- Finish Onboarding
- Continue Journeys
- Check Projects Tasks
- Manage Contacts
- Check Invoices
- Add New Invoices Items

Workspace Overview Grid

This section details active numbers, pipeline evaluations, and tracking counters across individual hubs:

- Strategy Hub: Tracks 100 Tasks, 1 Issue, 3 Notes, and notes a Last Updated milestone of 5/21/2026.
- CRM: Tracks 0 Deals, 10 Contacts, 0 Tasks, and a \$0 Pipeline.
- Projects: Displays 11 Active elements, 50 Milestones, 0 Tasks, and 0% Progress.
- Invoices: Features clear zeroed baselines (0 Outstanding, 0 Pending, 0 Overdue, and \$0 Paid MTD) waiting for financial entry data.

4. Ecosystem Tools & Recent History

The lower portion of the workspace dashboard transitions into chronological tracking and immediate tool deployment options:

- Recent Activity Log: Chronologically lists ongoing iterations of the Founder Journey, tracking updates from "Just now," "22h ago," "2d ago," stretching back through 5/28/2026 and 5/22/2026.
- Recent Tool Short-keys: Quick buttons to spawn new entries for Journeys, Strategy Items, Strategy Hubs, or Project Milestones.
- Recommended Tools Grid:
 - Invoice Generator: Built to create professional invoices in minutes (Category: Business).
 - QR Code Generator: Designed to generate custom QR codes for any purpose (Category: Utility).

- QR Code Reader: Instant decoding optimization for mobile or layout use (Category: Utility).
 - Text to Speech: Converts raw text inputs into natural-sounding audio speech assets (Category: Productivity).
 - Wordcloud Generator: Visualizes input copy into beautifully mapped brand word clouds (Category: Design).
