BuildRunKit Invoices: Unbilled Services Sub-Section

BuildRunKit Invoices: Unbilled Services Sub-Section

The Unbilled services sub-section shows delivered work that is waiting to be included on an invoice, grouped by payer and service.

Filters

- All statuses filters the displayed unbilled services by status.
- All payers filters the displayed unbilled services by payer.

Summary Cards

The page displays:

- Unbilled lines — the number of unbilled service lines.
- Payers — the number of payers associated with the unbilled services.
- Unbilled value — the total value of the unbilled services.

These figures reflect the workspace’s data and may change over time.

Unbilled Services

The Unbilled services panel displays delivered work waiting to be included on an invoice. When there are no unbilled lines, it displays: “No unbilled lines. Delivered work appears here until an invoice picks it up.”
