BuildRunKit Saved Outcomes Sub-section

Saved Outcomes Sub-section

The **Saved Outputs** module (displayed as **Saved Outcomes**) tracks two core elements of your progress: **Founder Journey Sub-Stage Completions** and saved **Output Subsections**. It serves as a central log showing what steps you completed, when they were finished, and the exact outputs or documents generated during each sub-stage.

Metrics Summary Cards

- **Total Outcomes**: Displays the aggregate count of all completed sub-stages and saved outputs (*e.g., 100*).
- **Stage Completions**: Tracks fully completed main journey stages (*e.g., 0*).
- **Journey Completions**: Tracks end-to-end finished founder journeys (*e.g., 0*).
- **Substage Completions**: Tracks completed founder journey sub-stages and their associated outputs (*e.g., 100*).

Search & View Controls

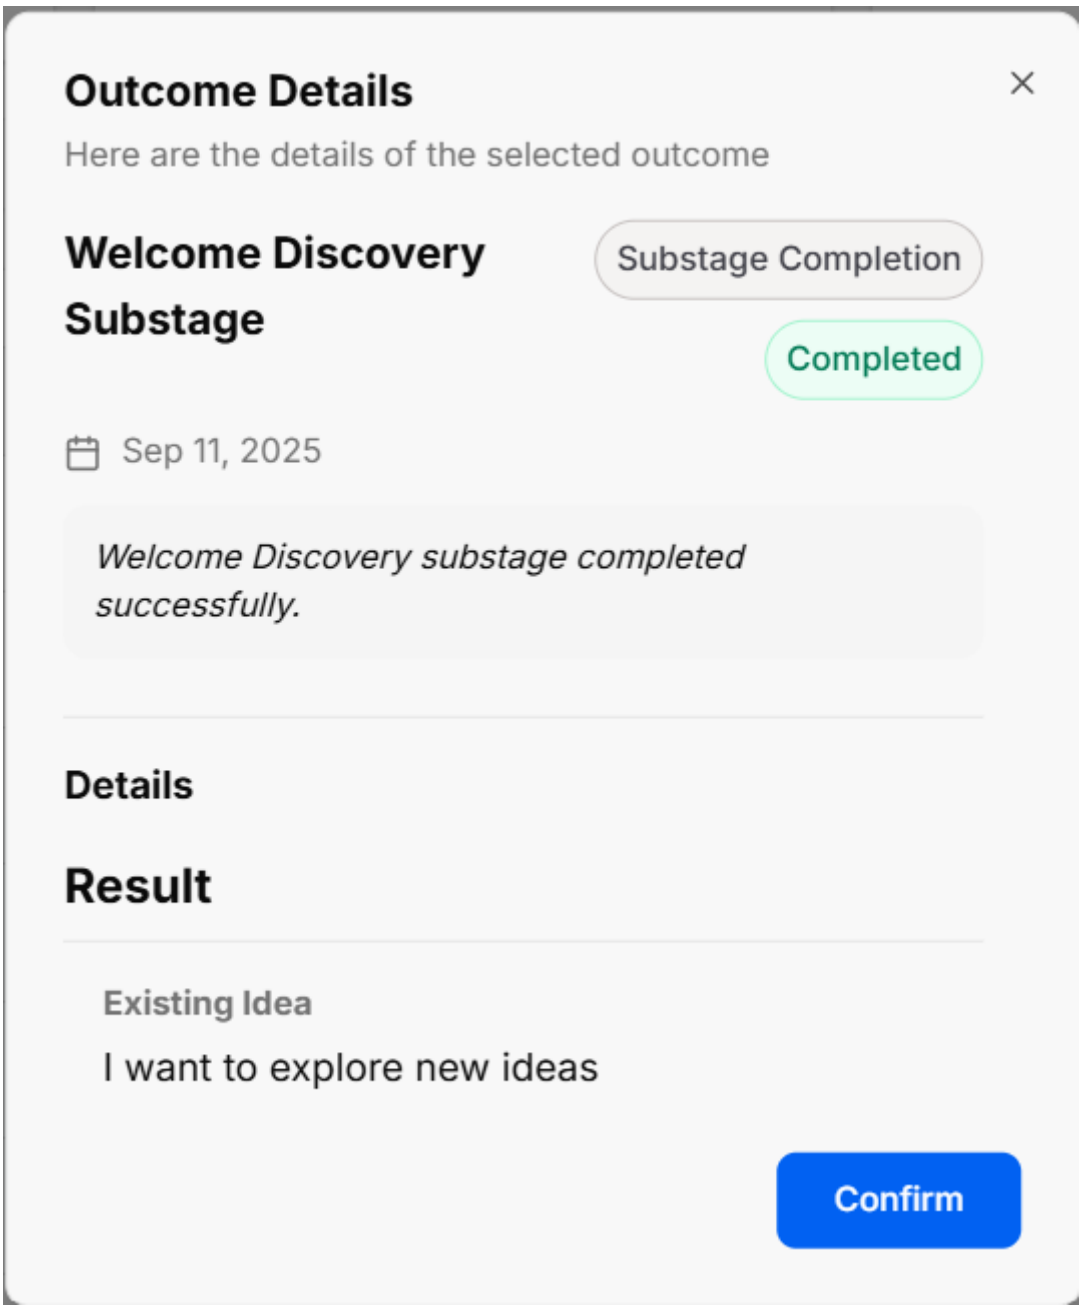

- **Search Input Field**: Real-time search bar to quickly filter completed sub-stages or saved output subsections by keyword (*e.g.,* "*Search outcomes...*").
- **View Toggles**: Switch layout between **Table** view and **Grid** view.

Sub-Stage Progress & Saved Outputs Log

- **Title Column**: Shows the specific completed founder journey sub-stage or saved output subsection (*e.g., Welcome Substage, Info Substage, Orientation Substage*).

- **Created At Column**: Displays the timestamp recording when the sub-stage was completed and saved (*e.g., Sep 11, 2025*).
- **Action Menu**: Context menu (`...`) with options to **View Details**, allowing you to inspect the full saved output, responses, or generated content for that specific sub-stage.

Viewing Outcome Details

When clicking **View Details** from the action menu on any log entry, an **Outcome Details** modal window opens to show full sub-stage information and recorded results:

- **Substage Title & Metadata**: Displays the sub-stage title (*e.g., Welcome Discovery Substage*), entry category (*e.g., Substage Completion*), status (*e.g., Completed*), and

timestamp (*e.g., Sep 11, 2025*).

- **Confirmation Message**: Callout box confirming successful completion (*e.g., "Welcome Discovery substage completed successfully.*").
- **Details & Result Section**: Displays saved user inputs, selected choices, or prompt responses recorded during the sub-stage (*e.g., Existing Idea: "I want to explore new ideas*").
- **Confirm Button**: Blue action button to acknowledge and close the modal view.
