

Saved Outcomes Repository

Saved Outcomes Repository

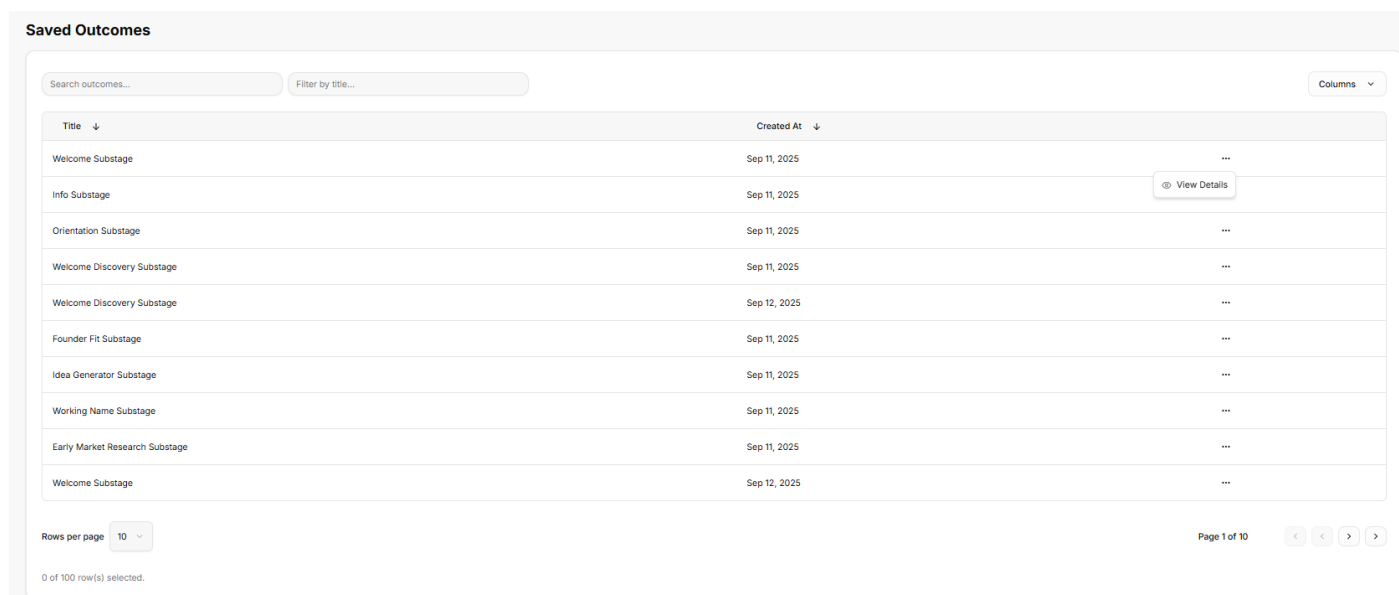

The Saved Outcomes section serves as a centralized digital filing cabinet for your progress. Instead of holding static text or marketing assets, this repository acts as a running historical record of every major decision, milestone, and phase completion achieved across the platform.

1. Accessing Your Saved Work

Locating your historical logs is straightforward within the workspace structure:

- **Sidebar Navigation:** The Saved Outputs tab is positioned directly on the primary left navigation panel. It illuminates with a light blue background when clicked.
- **Centralized Location:** It sits right alongside your core workspace hubs and tool suites, making it easy to jump from working on active tasks to pulling up past records.

2. Managing the Master Log Dashboard

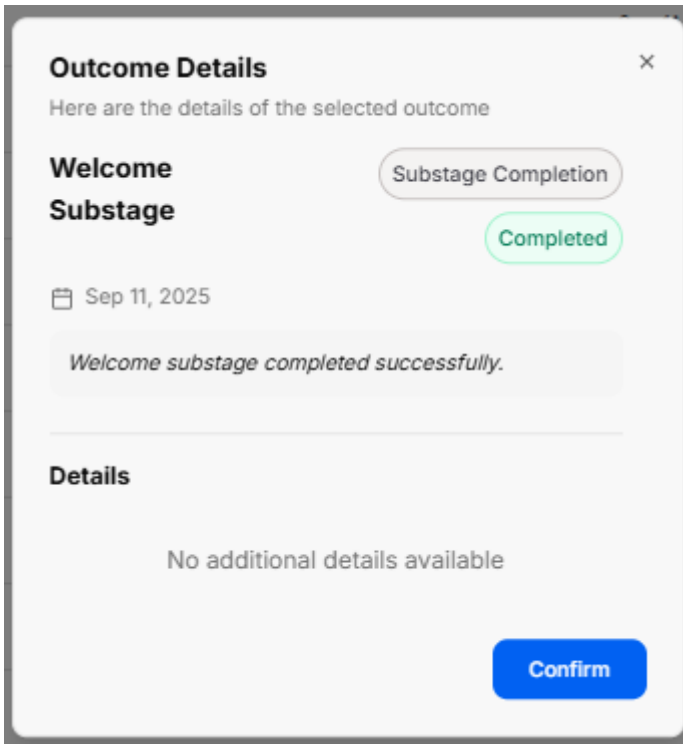

The screenshot shows a dashboard titled "Saved Outcomes". At the top, there are two search and filter fields: "Search outcomes..." and "Filter by title...". On the right, there is a "Columns" dropdown menu. Below these is a table with two columns: "Title" and "Created At". The table contains 11 rows of data, each representing a business milestone. The "Info Substage" row has a horizontal ellipsis menu icon (three dots) to its right, which is open, showing a "View Details" button. At the bottom of the table, there is a "Rows per page" dropdown set to "10" and a "Page 1 of 10" indicator with navigation arrows. Below the table, it says "0 of 100 row(s) selected."

Title	Created At
Welcome Substage	Sep 11, 2025
Info Substage	Sep 11, 2025
Orientation Substage	Sep 11, 2025
Welcome Discovery Substage	Sep 11, 2025
Welcome Discovery Substage	Sep 12, 2025
Founder Fit Substage	Sep 11, 2025
Idea Generator Substage	Sep 11, 2025
Working Name Substage	Sep 11, 2025
Early Market Research Substage	Sep 11, 2025
Welcome Substage	Sep 12, 2025

Once inside the repository, the platform provides a structured, high-level data table built to help organize and locate individual business milestones:

- **Search and Filter Functions:** Text entry fields at the top allow quick sorting by specific titles or keywords to pull up exact records instantly.
- **Chronological Record Keeping:** Every generated milestone is logged as a separate row, showing the precise title of the entry alongside an automatic timestamp indicating exactly when it was achieved.
- **Actionable Entries:** Selecting the horizontal ellipsis (...) on any logged row opens up a quick action menu where you can click View Details to pull up the deeper record.

3. Reviewing Individual Milestone Details

Opening a specific record triggers a clean pop-up window that breaks down exactly what that historical log represents:

- **Status & Type Badges:** The window clearly labels the entry type (such as a Substage Completion) and displays a distinct green stamp confirming its status as Completed.
- **Logged Activity Summary:** The window provides a quick text confirmation of the milestone reached, followed by a Details canvas. When a stage is marked complete, this space holds the specific notes, operational logs, or data blocks tied directly to that point in the journey.
- **Context Control:** A prominent Confirm action button at the bottom allows you to easily acknowledge the historical view and return to the main tracking list.

Revision #1
